## TOTAL FLEET OVERSIGHT: ONE UNIFIED VIEW

Gain complete control over videos, trip and driver data all in one place with Vision AI S, with a full view of your fleet's performance with easy-to-view and use dashboards that transform complex data into quick-to-action information to streamline your business.

VIDEO GALLERY

The Video Gallery helps streamline the process of reviewing video data for an organisation. Users can easily filter and search to select specific videos, which can then be loaded into the video player for closer examination.

INSIGHT DASHBOARDS

Insight Dashboards provides an overview of your fleet; showing trends, problem areas and how assets and drivers are impacting on the fleet's performance.

KPI MANAGER

KPI Manager allows you to easily track your pre-determined KPIs, effortlessly. It's never been easier to quickly identify problem areas and take corrective action to achieve your targets.
