

Powerfleet Unity:

Unifying every asset, vehicle, and operation with AIoT

Streamlined intelligence for your entire fleet ecosystem

The challenge

Disconnected systems and siloed data are slowing your operations, increasing risk, and creating costly inefficiencies. These challenges manifest in:

Costly inefficiencies & wasted resources

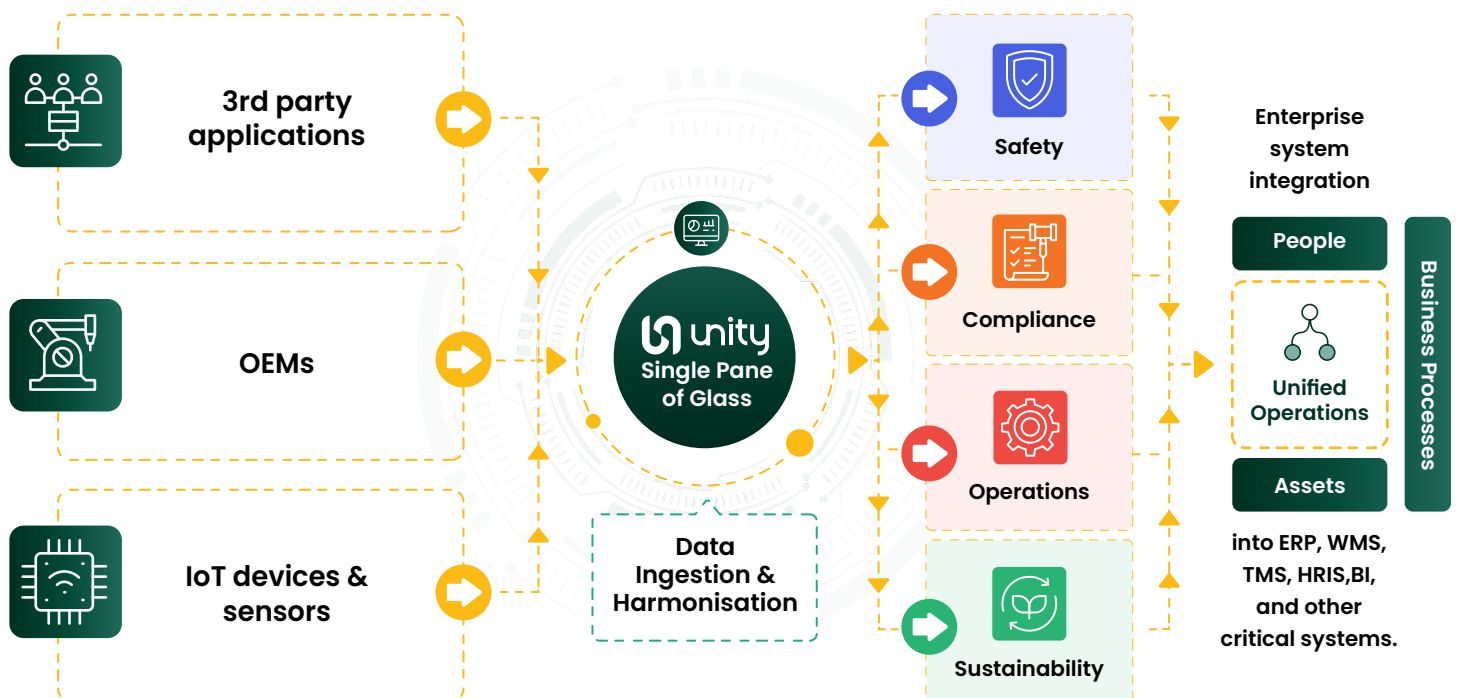

Fragmented reporting and compliance gaps

Lack of visibility across assets, vehicles, and people

Unify your data, empower your operations

Ingest, harmonise, and unify data from any source for end-to-end visibility and smarter decision-making.

From fragmented data to unified intelligence

Powerfleet Unity delivers comprehensive integration and insights:

1

Data ingestion & harmonisation from IoT devices, OEMs, third-party systems, and business apps.

2

AI-powered intelligence delivering predictive analytics, improved safety, compliance, and operational performance.

3

A single pane of glass across on-road, on-site, and supply chain operations.

4

Business system integration with ERP, WMS, TMS, and more to automate workflows and boost efficiency.

Unity transforms your business:

Efficiency

Reduce downtime & streamline workflows.

01

Safety & Compliance

Predictive AI lowers risk and ensures compliance.

02

Unified data across people, processes, and assets.

03

Visibility

04

Smarter, data-powered decisions.

ROI

Unity brings order to our data chaos."

-Carl Schultz, VP IT, IMC Logistics
