POWERFLEET®

Powerfleet Unity:

Unifying Every **Asset**, **Vehicle**, and **Operation** with **AIoT**

An AI-powered cloud platform that connects all your assets – from on-road to in-warehouse.

End Data Silos & Gain True Operational Intelligence

The Power of Unity in Action

Unity is driving measurable results for businesses worldwide.

35%+	**2.8**	**30%+**
increase in the value of business system investments, driving smarter, data-powered decisions.	million subscribers globally, powering smarter, safer operations.	reduction in wasted time & IoT vendor spend, improving operational efficiency and reducing system complexity.

The Challenge

Disconnected systems and siloed data are slowing your operations, increasing risk, and creating costly inefficiencies across your business.

The Solution

Powerfleet Unity seamlessly integrates data from most IoT devices, OEMs, and external sources—transforming fragmented information into actionable intelligence through AI-powered harmonisation, providing a single pane of glass to manage assets, people, and business operations. **Our SaaS-based, hardware-agnostic AI-driven platform provides:**

Complete visibility across warehouses, logistics hubs, and mobile fleets

Real-time insights for both in-facility assets and on-road vehicles

Predictive analytics that enhance safety, compliance, and performance

All through a single, unified interface that eliminates operational blind spots.

How Unity Transforms Your Business

Complete Operational Visibility

Gain real-time insights into assets, vehicles, and people across on-road, warehouse, and supply chain operations in a single pane of glass.

Unified Pane of Glass & Data Consistency

Aggregate data from most IoT devices, third-party systems, OEMs, and business applications, ensuring standardised reporting and complete operational visibility.

AI-Powered Intelligence

Harness machine learning and predictive analytics to reduce risk, improve compliance, and optimise operational performance.

Seamless Enterprise Integration

Break down silos with standardised APIs that connect with ERP, WMS, TMS, and more—automating workflows and improving efficiency.

> "Powerfleet Unity is purpose-fit to empower our digital transformation and Powerfleet's people truly care, a winning combination and a formula for success. In short, Unity brings order to our data chaos."
> -Carl Schultz, Vice President of IT, IMC Logistics

Experience Unity Today

Ready to unify your operations? Discover how Powerfleet Unity's AI-powered platform delivers seamless integration, real-time intelligence, and measurable business impact.
