

VISIONAI

See the risk. Stop the incident.

AI-powered video safety that monitors every driver on every trip – and helps you act before risks become serious incidents.

What does VisionAI do?

Your drivers face real risks every day, including fatigue, distraction, sudden hazards, and split-second decisions. VisionAI gives you the tools to protect them. By combining AI-powered cameras with real-time intelligence, VisionAI simultaneously monitors the road and the driver, detects dangerous behavior instantly, and helps you intervene before an incident occurs.

Detect risks in real time

VisionAI monitors for distracted driving, fatigue, mobile phone use, unsafe following distance, lane departure, and more – alerting the driver and fleet manager the moment a risk is detected.

Key
capabilities

Protect your business

Video evidence is automatically captured and stored during high-risk events. When an insurance claim or legal dispute arises, the footage provides an accurate, unbiased record.

Coach drivers, not just review footage

In-cab audio alerts guide drivers in the moment. Driver scorecards and event-tagged video clips make coaching conversations faster, more focused, and more effective.

One platform complete visibility

All video data is unified within Unity, Powerfleet's single-pane-of-glass SaaS platform, giving you a clear view of driver behavior, safety trends, and fleet performance across your entire operation.

25%

reduction in insurance costs

84%

improvement in driver safety scores

fewer collisions

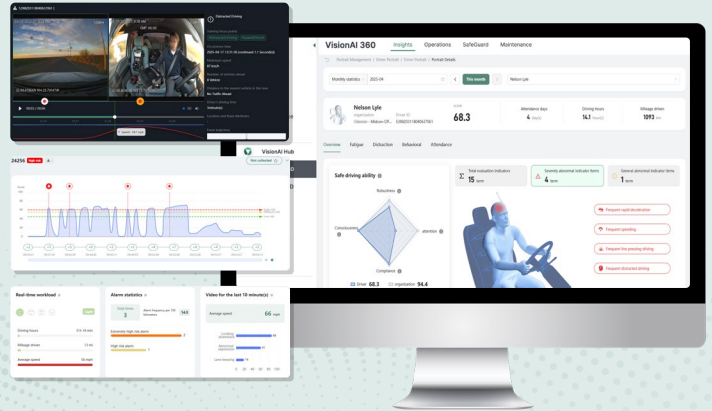

10:1

return on investment

SafeGuard

Go beyond alerts. Manage risk proactively.

SafeGuard is an add-on to VisionAI that continuously evaluates driver risk across your fleet, flags high-risk behavior in real time, and equips your team with the tools needed to intervene before incidents happen.

Up to **95%** fewer false alerts.

Spend **80%** less time reviewing video footage.

See VisionAI in action.
