

VISIONAI

VisionAI S combines vehicle tracking with a single camera device advanced video for a comprehensive solution that's quick to perform and easy to install. It helps you monitor vehicle location, driver behaviour, and driving quality. This integrated data aids in making informed decisions to enhance fleet safety and efficiency at a cost-effective price.

KEY FEATURES

GPS tracking location and positioning.

Driver behaviour data.

Driver ID via MyMiX app.

AI-based video telematics (ADAS & DMS).

Fast installation without an onboard computer.

Cost-effective video telematics to maximise safety.

BENEFITS

- ✓ Driver safety monitoring (fatigue*, smoking, distraction, mobile phone use, missing seatbelt).
- ✓ Alerts for road events (unsignalled lane departure and forward-collision warning).
- ✓ Video retrieval (8sec clips of all camera views, custom video requests, HD quality).
- ✓ Driver performance management.
- ✓ Location-based events, including geofencing.
- ✓ Exoneration from wrongful third-party claims.
- ✓ Competitive pricing.
- ✓ Asset movement/utilisation management.
- ✓ Real-time driver coaching.

*Fatigue monitoring requires an additional camera.

CHOOSE VISIONAI S IF

1

You're an existing customer with grey/mixed fleet that needs tracking and the power of video telematics.

2

You're a new customer with LCV and car fleets that would benefit from tracking and video telematics.

3

You're an HGV operator considering a tracking solution that's backed by video telematics - providing safety and compliance in one solution.

4

You're a fleet operator who needs to monitor vehicle position, driving behaviour and video telematics without the need for vehicle data.

TOTAL FLEET OVERSIGHT: ONE UNIFIED VIEW

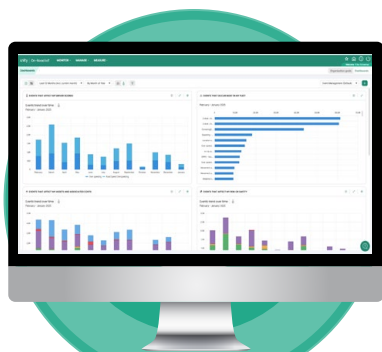

Gain complete control over videos, trip and driver data all in one place with VisionAI S, with a full view of your fleet's performance with easy-to view and use dashboards that transform complex data into quick-to-action information to streamline your business.

VIDEO GALLERY

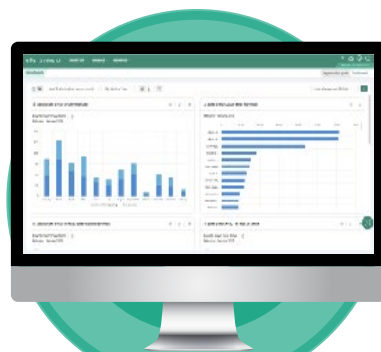

The Video Gallery helps streamline the process of reviewing video data for an organisation. Users can easily filter and search to select specific videos, which can then be loaded into the video player for closer examination.

INSIGHT DASHBOARDS

Insight Dashboards provides an overview of your fleet; showing trends, problem areas and how assets and drivers are impacting on the fleet's performance.

KPI MANAGER

KPI Manager allows you to easily track your pre-determined KPIs, effortlessly. It's never been easier to quickly identify problem areas and take corrective action to achieve your targets.
