

MATERIAL HANDLING TELEMATICS

Forklift Scales

On-Board Forklift Hydraulic Weighing Scales

The **Forklift Scales** are equipped with an easy-to-read LCD screen, which indicates a load's calculated weight and bar graph of the load's status. With the scales, shipments will not exceed trailer capacity, waybills are in line with actual weight, lift truck capacity is not exceeded, and material inventory matches actual weight.

Powerfleet offers two models of scales for forklifts and other material handling equipment.

These scales enable tracking of production data and freight loads, while differing in their precision percentage.

Developed to withstand rugged applications, the Forklift Scales fit seamlessly to most makes and models of forklifts and other material handling equipment.

Key features

Accurate to +/- 2% of the forklift capacity (Forklift Scale)

Accurate to +/- 0.2% of the forklift capacity (i.e. +/- 4.5 Kg for a 2268 Kg rated forklift (similar to load cell solutions) (Forklift Scale Precise)

Time stamped data can be extracted with Wi-Fi, direct printer connection, USB stick and SD card (Forklift Scale Precise)

Waterproof, easy-to-read LCD display

Designed for heavy industrial use.

Designed to revolutionize your fleet operations

The **Forklift Scales** aim to transform and modernize your material handling operations:

Increase efficiency

Reduce costs

Increase longevity of assets

Protect brand reputation

Boost employee morale
