POWERFLEET®

PRODUCT OVERVIEW

VEHICLE TELEMATICS

# **MiX Talk**: Keep **drivers connected without** using a **mobile phone**

Controlled, hands-free calling for fleet vehicles.

**MiX Talk** gives drivers a fixed, hands-free way to make and receive approved calls. Four speed-dial buttons provide direct access to preconfigured contacts, while incoming calls can be limited to approved numbers. A separate microphone and speaker are installed inside the vehicle, allowing drivers to communicate without holding or operating a mobile device.

## **Control** who **drivers** can **call**

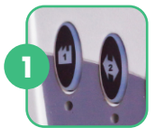

### Four-button speed dial

Configure up to four outgoing numbers to give drivers quick access to the people they need to contact.

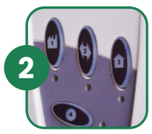

### Manage incoming calls

Allow incoming calls from up to four approved numbers, or configure an open line to accept calls from any number.

## **Designed** for simple, **hands-free use**

**MAKE A CALL**
Press one of the four numbered buttons.

**ANSWER A CALL**
Press any numbered button.

**END A CALL**
Press the red telephone button.

**Safer, simpler communication on the road**

# Key **features**

### Fixed in-cab system

A separate speaker, microphone, keypad and external antenna are installed inside the vehicle.

### Protected SIM access

The nano-SIM is housed inside the main control unit and protected by an individually encoded PIN.

### Adjustable speaker volume

Control the speaker volume manually using the knob on the speaker unit.

### Flexible configuration

Configure MiX Talk directly through a serial connection or remotely by SMS. Additional configuration options may be available depending on the market and installation.

### Automatic radio mute

A compatible in-cab radio can be muted automatically during incoming and outgoing calls.

### Configurable auto-answer

Set the unit to answer incoming calls automatically after a predefined number of rings.

### Incoming-call buzzer

Alerts the driver to incoming calls, even when the speaker volume has been turned down.

### LTE and 2G connectivity

Supports cellular voice communication across LTE Cat 1 and 2G networks.
