Blindspot Detection Camera

Smarter vision, stronger protection
— built for every road and condition

The **Blindspot Detection Camera** combines advanced pedestrian detection, roadside recognition, and motion trend prediction with intelligent black-light full-color night vision. The exposed lens design minimizes rain and dust interference, while its rugged build meets seismic vehicle standards and achieves the highest IP69K protection rating.

● Advantages

- Support multi interface alarm output (IO, IPC, RS485), multi-level alarm
- AHD PAL/NTSC video output can be set, supporting external displays
- IPC video output, supporting external MDVR and calibration
- Supports GPS, vehicle speed, and turn signal inputs
- Single model suitable for different installation positions
- Diverse combinations of solutions
- Typical applications: blind spot detection for large vehicles, intelligent upgrade of ordinary MDVR
