

(NON-VIDEO DATA)

PowerHome SIM Card

Reliable multi-network roaming
throughout South Africa.

A PowerHome SIM card* offers fleets operating in South Africa reliable, multi-network roaming across at least three major carriers, ensuring better coverage and uptime. Designed to support data-heavy telematics, it provides fixed monthly pricing for seamless and predictable fleet connectivity.

**Not compatible with bundled services for VisionAI & MiX Talk.*

Features

PowerHome works with Powerfleet's Essential and Premium On-Road solutions. The SIM card makes transmitting non-video telematics data easier by automatically connecting to the strongest available network within South Africa, ensuring dependable service even in areas with low coverage.

It offers:

A dynamic connection to multiple South African networks, enhancing uptime and signal quality.

A fixed monthly pricing model for simple budgeting and financial management.

Fully automatic network switching; no manual intervention required to maintain connectivity in areas with weak network coverage.

Designed to comply with local telecom regulations, ensuring smooth local roaming.

Available for new installations and retrofits.*

** A SIM swap fee applies*
