POWER⊗FLEET®

VisionAI 360

See the **Full Picture**, Act in **Real Time**

AI-powered video intelligence built to detect risk as it happens, accelerate decisions, and improve outcomes – seamlessly integrated into your fleet's daily operations.

The Challenge

Fleets face constant pressure to improve safety outcomes, protect drivers, reduce liability, and operate more efficiently. But most video solutions only offer reactive tools, delivering raw footage long after risky behaviour already happened. This leaves operations teams stuck in review mode, unable to act when it matters most. To truly optimise performance and protect drivers, fleets need a smarter approach that surfaces critical moments as they unfold.

How We Help

VisionAI 360 transforms how you manage fleet safety by delivering AI-powered video insights, advanced video review, and actionable data – all through a single interface. Embedded within Powerfleet's Unity platform, it brings key tools together in one place.

Live video	Trip tracking	Vehicle data	Alerts	Streamlined workflows

Your team can access everything they need with a single login, gain full situational awareness, and take fast, informed action.

Key Highlights

Safety & Risk Dashboards

- Get real-time visibility into driver activity and vehicle status across your fleet
- Identify patterns and surface priority risks for faster response

Live Tracking & Operational Tools

- Track vehicle movement with live maps, trip replays, and video overlays
- Trigger alerts, access live audio, message drivers, or speak to them directly

Video Review & Event Library

- Request and review specific dashcam footage quickly
- Filter events by behavior type, severity, or time using advanced search tools

Insights & Analytics

- Monitor safety and performance by site, vehicle, or driver
- Use data-driven insights to guide coaching and reduce operational risk

Take Safety Even Further with SafeGuard

VisionAI SafeGuard is an intelligent add-on to VisionAI 360 – the industry's first real-time risk management solution. Giving you:

Predictive risk prevention
Identify and address threats before they escalate.

Dynamic real-time driver risk profiling
Track evolving risk to focus intervention where it matters most.

Minimise unnecessary alerts by up to 95%
Cut alert fatigue and surface what truly requires action.

80% less manual video review
Free up your team to focus on critical safety decisions.

Ready to take the next step?

Discover how VisionAI 360 and SafeGuard can transform your fleet safety strategy.
