

Powerfleet for waste & recycling operations

Safer routes. Smarter fleets. Stronger margins.

Most waste and recycling operators respond to safety incidents after they happen. Powerfleet flips that model by combining AI video, real-time data, and operational intelligence into one unified platform to identify risks before they materialise.

The challenge waste fleets face

Waste and recycling fleets operate in one of the most hazardous and liability-prone environments, characterised by:

● The Powerfleet difference

Unlike fragmented solutions that need multiple systems, Powerfleet unifies AI video, real-time vehicle data, and operational intelligence into one integrated platform

This prevents dashboard clutter and allows you to proactively coach drivers, identify high-risk routes and behaviours, and respond to incidents with clear, defensible video evidence.

Real & measurable benefits

Prevent incidents before they happen

- VisionAI detects driving behaviour, including distraction, fatigue, speeding, harsh braking, and seatbelt use
- In-cab alerts coach drivers in real time – before an accident occurs
- Identify high-risk routes, locations, and driving behaviours to tailor driver coaching

Defend claims & reduce liability

- Automatic video capture during near, missed, or real incidents
- Clear, time-stamped video evidence for disputes and false claims
- Faster claims resolution and stronger insurer negotiations

Improve route & fleet performance

- Streamline vehicle maintenance and inspections
- Optimise vehicle routes, idle time, and utilisation
- Limit downtime and extend vehicle lifespan

Unify data across operations

- One unified data platform for video, vehicle tracking, safety, and compliance – for on-road and on-site
- Eliminate dashboard sprawl and manual reporting
- Real-time visibility for fleet, safety, and leadership teams

Why waste & recycling leaders pick Powerfleet

Powerfleet is designed to scale across the diverse operations of waste fleets, without compromise or fragmentation.

Operational Context

Residential & commercial routes

Automated, front-load, rear-load, roll-off trucks

Municipal and private fleets

Union and non-union environments

How Powerfleet Works

VisionAI detects risks across all environments; in-cab alerts and coaching apply to every route type

One unified platform manages all truck types; no separate systems required

Integrated compliance and reporting works across fleet ownership models

Scalable driver accountability and coaching across all labour structures

The business impact

--- Reduce the risk of incidents

--- Lower insurance and legal exposure

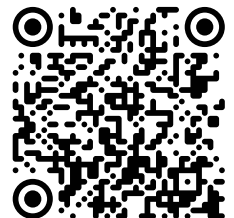

--- Stronger driver accountability and retention

--- Improved public safety and brand reputation

Deploy scalable and safety-first connected solutions.

Protect your drivers, your community, and your bottom line.

Powerfleet (Nasdaq: PWFL; JSE: PWR; TASE: PWFL) is a global leader in the artificial intelligence of things (AIoT) software-as-a-service (SaaS) mobile asset industry. With more than 30 years of experience, Powerfleet unifies business operations through the ingestion, harmonisation, and integration of data, irrespective of source, and delivers actionable insights to help companies save lives, time, and money. Powerfleet's ethos transcends our data ecosystem and commitment to innovation; our people-centric approach empowers our customers to realise impactful and sustained business improvement. The company is headquartered in New Jersey, United States, with offices around the globe. Explore more at www.powerfleet.com.
