

## SAFEGUARD

# Prioritise What Matters. Act When It Counts.

AI-powered risk intelligence to stay ahead of risk, respond faster, and protect your drivers – before incidents happen.

## The Challenge

Modern video telematics platforms provide valuable visibility into driver safety and fleet operations. As fleets scale, safety teams need faster ways to identify high-risk behaviour, prioritise important events, and respond more efficiently across daily operations.

SafeGuard adds an intelligent prioritisation layer to VisionAI, helping fleets focus attention where it matters most.

## The SafeGuard Advantage

SafeGuard is the industry's first real-time risk management solution, available as an add-on to VisionAI for on-road fleet operations. Fully embedded in the Unity platform, it continuously evaluates risk, flags high-risk behaviour, and gives your team the tools to act when it matters most.

**Proactive risk management** – Intervene before it's too late.

Up to **95% fewer false alerts** – Improve event visibility and focus faster on higher-priority safety events.

**80% reduction** in video review time – Spend less time reviewing footage and more time focused on driver safety.

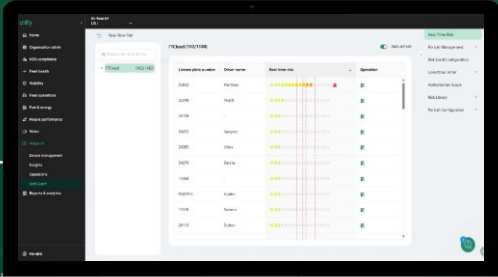

**3+ hours saved** per driver/month – Quickly identify the events that matter the most.

# Key Capabilities

## Real-Time Risk Dashboards

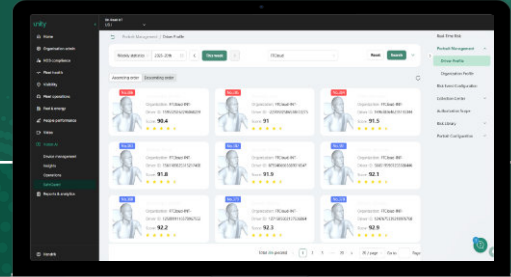

- Get live visibility into driver risk trends and prioritised safety events across your fleet.
- Spot urgent issues by driver, behaviour type, and severity – all from one dashboard.

## Dynamic Risk Profiling

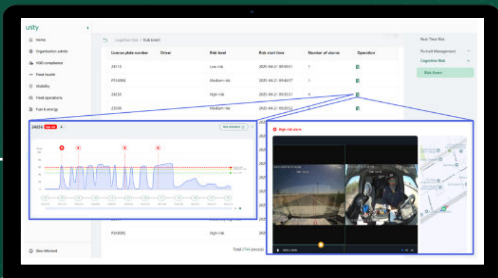

- Uncover risk patterns like fatigue, distraction, and mobile phone use.
- Track risk scores over time to identify high-risk drivers for early coaching.

## Event Review & Risk Library

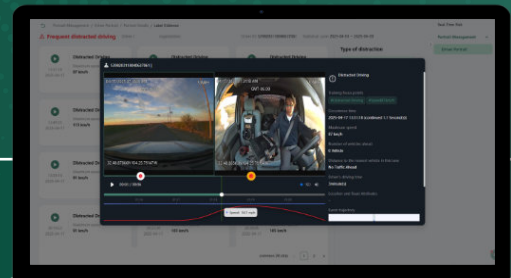

- Automatically capture high-risk events with AI-labelled context and video evidence.
- Quickly search and review incidents for investigations, compliance, or performance reviews.

## Live Intervention Tools

- Monitor risk in real time with live video, audio, and driver profile insights.
- Send alerts, initiate coaching, or speak directly to the driver to prevent escalation.

## Ready to see SafeGuard in action?

Book a live demo to see how SafeGuard helps fleets prioritise risk, improve safety visibility and respond faster to high-risk driver behaviour.

Powerfleet (Nasdaq: PWFL; JSE: PWR; TASE: PWFL) is a global leader in the artificial intelligence of things (AIoT) software-as-a-service (SaaS) mobile asset industry. With more than 30 years of experience, Powerfleet unifies business operations through the ingestion, harmonisation, and integration of data, irrespective of source, and delivers actionable insights to help companies save lives, time, and money. Powerfleet's ethos transcends our data ecosystem and commitment to innovation; our people-centric approach empowers our customers to realise impactful and sustained business improvement. The company is headquartered in New Jersey, United States, with offices around the globe. Explore more at [www.powerfleet.com](http://www.powerfleet.com).
